Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

Group I: Claims 14-21, drawn to a combination of a system for packaging stamps, classified in Class 206, subclass 497 and others.

Group II: Claims 1-13 and 22-27, drawn to a subcombination of a stamp or a coil of stamps, classified in Class 428, subclass unknown.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination as claimed does not require the particulars of the a paper layer, the starch layer, the pressure sensitive adhesive layer, the ink layer, the primer layer or the silicone layer. The subcombination has separate utility such as being used by itself as a label.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because by their different classification and because they are capable of separate manufacture, use and sale, restriction for examination purposes as indicated is proper.
